

NETWORKING THE NATION PROGRAM
PROJECT FUNDING LIST – SOUTH AUSTRALIA
As at JUNE 2005

Note: Some of the Project Descriptions are currently under review

Project Number	Project Name	Project Recipient	Project Description	NTN Funding Provided
SA1997/001	Spencer Network Access Project	Eyre Regional Development Board	<p>The project provided the information technology infrastructure for a wide area of South Australia including areas within the Mid North, Far North and Eyre Peninsula to deliver local call access to the Internet. Points of Presence (POP) were established across the Eyre Peninsula.</p> <p>The project successfully attracted an Internet Service Provider to the Peninsula, and substantially attributed to the development of benefits of the Internet, in terms of communications, in sourcing information, business and educational purposes, breaking down previous barriers for businesses and individual community members. PROJECT WAS TERMINATED</p>	\$369,500
SA1997/002	Wudinna Telecentre Video Conferencing	Wudinna and Districts Telecentre Inc.	A videoconferencing facility was established in Wudinna, located on the Eyre Peninsula, which assisted in reducing disparities in access to services between the community and metropolitan areas. The facility was launched on 7 April 1998.	\$40,000
SA1997/005	Kimba Community Access Centre	Kimba Community Development Board	<p>The Community Access Centre provided the Kimba community and adjoining areas with access to web enabled PCs and Internet training. The Centre, known as the Kimba Learning and Business Centre, was Incorporated on 19 February 1998 and opened its doors in July 1998.</p> <p>It has provided the whole community with Internet access. A substantial amount of IT experience has been passed onto individuals in the community, either by their involvement with the project or through participation in courses or other activities at the Centre. The community has also benefited from access to DeskTop Publishing services not normally available in small communities. Centre users have been able to access to Government and educational services.</p>	\$100,000

SA1997/006	Eyre Peninsula Regional Communications Initiative	Eyre Regional Development Board (ERDB)	A feasibility study was conducted examining the telecommunications needs for the Eyre Peninsula region. The project was jointly funded with the State Government and the region. The study provided a business case for extended point's of presence, network infrastructure and extended mobile phone coverage. The study formed the basis for further NTN applications for mobile telephony (SA1999/82).	\$82,500
SA1997/007	South East Health Service Directory	South East Health Service Inc	Access to local health care services was enhanced for the Mount Gambier community (extending to all of southeast South Australia up to and including Bordertown and Keith) through the funding of infrastructure and training to support operation of a help desk providing health service information.	\$16,297
SA1997/013	Electronic Commerce Demonstration	South East Economic Development Board	The project assisted the South East Electronic Trading Initiative (a community owned Internet venue) extend its geographic coverage to areas adjacent to Mount Gambier. The Initiative gave the region local Internet trading, an access point for community services and provide an introduction to the region, its businesses and its services.	\$171,250
SA1997/017	Barossa Regional Telecommunications Initiative	Barossa Regional Economic Development Authority	A study was undertaken to examine the telecommunications needs of the Barossa and surrounding region. Four initiatives were identified, these being: Establishment of a new low cost, high quality non-profit 'Regional Telecommunications Company'; Development of electronic commerce applications designed to support the local wine industry; Establishment of a "Tourism Operators Network"; and The undertaking of an electronic commerce awareness and support project to stimulate its on-going uptake in the region.	\$85,000
SA1997/019	Coorong Microwave Communication Project	The Coorong District Council	<p>In partnership with an Adelaide based carrier, Agile Communications, the Coorong District Council successfully established a broadband microwave network which provides the Coorong regional communities with improved telecommunications services and reduced costs. The project was one of the first of its kind and considerable research went into the successful planning and implementation of a VoIP network that would be available to the whole community.</p> <p>The project created an effective partnership between the Australian Government, State and Local Government and private enterprise. The total cost of the project was estimated at around \$2M of which NTN contributed 45%. The balance of the fund came from the South Australian State Government, Agile Communications and the Coorong District Council.</p> <p>The new network was launched on the 26 April 2001 by the</p>	\$892,000

			Prime Minister, John Howard, and has exceeded expectations with tangibly higher capacity and cheaper data and voice links for the Coorong.	
SA1998/021	Regional Electronic Communications Project	Adelaide Hills Regional Development Board with the Fleurieu, Kangaroo Island and Southern Regional Development Boards	<p>Demonstration projects, seminars and workshops, surveys and evaluations were undertaken to stimulate and increase the use of information and communication technologies by the tourism, wine and food sectors across the Adelaide Hills, Fleurieu Peninsula and Kangaroo Island regions.</p> <p>Twenty-seven participants across the three regions were assisted with development or enhancement of their Internet presence. New technologies were developed and trialed throughout the project.</p>	\$120,000
SA1998/028	Networking Tumby Bay	Tumby Bay Community Development Board Incorporated	The project established a network between the community's Development Office, Community Access Centre, Council and Community Library, to provide enhanced access to Internet and videoconferencing facilities. The project raised business awareness of the benefits from improved information technology use. The Project also upgraded the Community Access Centre's equipment to meet increased community demand for IT.	\$68,843
SA1998/029	Regional Internet Services	Local Government Association of South Australia	The project provided points of presence to 9 regional communities to supply local call internet access. Training in Internet and email use was provided for the applicants' staff and the community at each centre over the three years from 1998. Direct outcomes from the project included improved quality, cost and speed of access to the Internet, including improved public access through libraries. Project SA1998/062 extended the original project by exploring options to attract additional functionality, including higher bandwidth to community users.	\$679,166
SA1998/032	South East Health Service Video Conferencing	South East Health Service Inc	The project extended the delivery of health and community services across the southeast region using video conferencing links. The project trial evaluated costs and benefits for the State's Regional Health Services, community service providers, health practitioners and the regional community. Funding provided eight video conferencing units, associated equipment and staff training in its use.	\$282,360
SA1998/034	Port Lincoln Online	City of Port Lincoln	The project established a community access centre providing free access to online services for the community, local and isolated students and businesses in Port Lincoln and the	\$105,000

			adjoining region.	
SA1998/035	Gateway to the World	Yankalilla Tourist Information Centre	This project provided a PC connected to the Internet and email for the use by tourists and the local community. 'Gateway to the World' has enabled the Visitor Information Centre at Yankalilla, South Australia to offer the travelling and non-travelling public access to internet and e-mail facilities. Computer equipment has provided the opportunity for general word processing applications to take place.	\$10,000
SA1998/041	Eyre Peninsula Regional Communications Infrastructure Implementation	Eyre Regional Development Board	A feasibility plan of options for affordable enhanced telecommunications services for community and business clients across the Eyre Peninsula was undertaken. The study explored options including upgrading existing infrastructure and introducing alternative telecommunications infrastructure.	\$100,000
SA1998/042	Regional Internet Access	Local Government Association of South Australia	The project provided free public access to the Internet throughout South Australia at 91 public libraries, 12 regional development boards and for some remote indigenous communities. From these sites, communities are able to access online services and information.	\$1,493,400
SA1998/045	SA Virtual Health Network	Telehealth Partners (Women and Children's Hospital and Northern Western Adelaide Health Service)	The project established a videoconferencing network to provide telehealth services for communities in the Far North Regions of South Australia. The project covered the remote communities of Coober Pedy, Marla, Oodnadatta, Roxby Downs, Andamooka, Port Augusta, Hawker, Quorn, and Leigh Creek. It offered a range of diagnostic and consultative health services from primary health care to specialist care for patients in rural and remote communities. The services link the communities with the Port Augusta hospital and metropolitan tertiary hospitals, the Women's and Children's Hospital and the North Western Adelaide Health Services.	\$778,317
SA1998/046	Southern Goyder Telecommunications Network	Southern Goyder Telecommunications Network Incorporated	This project established community access centres in Eudunda and Robertstown and provide people in these communities and adjoining areas with access to the Internet and other online services including training. The telecentres have covered the original community needs with all objectives, milestones and performance indicators of the project being met.	\$82,950
SA1998/047	Connecting Indigenous Community Links - Stage 1	Nangkada Tjikarna Council Inc	This project established community access facilities at Kurungk (Camp Coorong) and Narrungga (Point Pearce) to provide these communities with PCs connected to the internet and training in their use. The second stage of the project was also funded under NTN (SA)	\$77,000

SA1998/048	Yorke District Videoconferencing Links	Yorke District Department of Education, Training & Employment	The project provided videoconferencing facilities for a network of schools and TAFE campuses on the Yorke Peninsula that facilitates the delivery of training and education. The facilities have improved communication between regional, local and community groups and agencies outside the education sector. Videoconferencing sites have now been established at Kadina Memorial high School, Moonta Area School, Port Broughton Area School, Snowtown Area School, Maitland Area School, Ardrossan Area School and Minlaton District School. All sites are now fully operational. The project has realised savings in time and money as a result of the new infrastructure.	\$179,053
SA1998/049	Equity of Access to the Justice System - Videoconferencing pilot (Bushlink)	SA Courts Administration Authority	A pilot videoconferencing project was established at three sites (Port Augusta, Whyalla and Amata) across South Australia to trial the use of videoconferencing facilities for accessing legal services for a 12 month period. The project highlighted the benefits of videoconferencing for court cases and for prisoners to have contact with family. Six sites have now been established at Amata, 2 at Port Augusta, Whyalla and 2 in Adelaide. All key users in the use of the videoconferencing equipment have been trained and public awareness of the Project has been conducted. Tangible benefits were accrued from costs saved in witness fees including travel and accommodation costs. As a direct consequence of this project video conferencing units will be established at Yalata, another remote Aboriginal community in the far West of the State.	\$73,501
SA1998/050	Internet Services to Northern Flinders Ranges	Northern Flinders Communication Development Association	This project established a point of presence at Leigh Creek to provide Internet access at local call rates to communities and businesses in Leigh Creek, Copley, Nepabunna, Beltana, Parachilna, Lyndhurst, Blinman and pastoral properties and tourist facilities across the region. Training has been provided through the local T.A.F.E. It has been estimated that 100 users make use of the service following the project	\$78,285
SA1998/052	Regional Videoconferencing Facilities	Local Government Association of South Australia	The project established videoconferencing facilities at 13 sites across South Australia to provide businesses, government, management groups and the broader community with access to telemedicine, telecommuting, remote learning, and training opportunities.	\$200,970

SA1998/055	Yorke town Regional Telecentre	Yorke town Progress Association	Establishment of a community access centre in Yorke town and provision of a regional IT Development Coordinator to promote the uptake of IT on the Southern Yorke Peninsula. The centre will provides community access to the Internet, online learning, act as a youth and community centre, business resource centre, training facility and centre for IT equipment and excellence in Yorke town. The centre was opened on 31 May 2000 and has the only implementation of Voice over IP, networked A3 colour photocopying/scanning and printing in the region. The High speed connectivity delivered by the project has given the community the ability to stream interactive teaching courses.	\$252,386
SA1998/056	Southern Mallee Community Access Centre	Southern Mallee District Council	The project established community access centres in Pinnaroo, Lameroo and Geranium. The Centres which have been established and well integrated into the community libraries provide people in these three communities and adjoining areas with access to web enabled PCs and Internet training.	\$170,000
SA1998/057	Internet Cafe & Technical Support for the Central Eyre Peninsula	Wudinna and Districts Telecentre Inc	Provision of a public Internet Access Point and technical assistance for the Central Eyre Peninsula community. The Project provides public Internet access service for the community and visitors to Wudinna. Since the project began in 1998, the Telecentre has doubled its business turnover and expanded the range of services provided to the community.	\$146,163
SA1998/061	Barossa Region Telecommunications Initiative	Barossa Regional Economic Development Authority	A Business case was undertaken to examine the options of establishing alternative telecommunications solutions for the Barossa region. The study recommended the establishment of an alternative telecommunications network. However, it was decided not progress the recommendations of the case pending the outcomes of other alternative telecommunications models being trialled across Australia.	\$37,500
SA1998/062	Regional Internet Access Project - Ethernet Extension	Local Government Association of South Australia	The project provided points of presence to 10 regional communities to supply local call internet access. Training in internet and email use was provided for the applicants' staff and the community at each centre over the three years from 1998. Direct outcomes from the project included improved quality, cost and speed of access to the internet, including improved public access through libraries. Project SA1998/062 extended the project SA1998/029 by exploring options to attract additional functionality including higher bandwidth to community users.	\$44,470
SA1999/064	Whyalla Electronic Commerce Centre (WECC)	University of South Australia, Whyalla Campus	The establishment of the Whyalla Electronic Commerce Centre provided awareness and education sessions and training programs in e-commerce and communications applications for small business, allied health and other professional services, as well as general public access to Internet and online services. This Centre is being used extensively by the University of the 3 rd	\$189,415

			age to provide Seniors with training to improve their IT literacy skill and knowledge.	
SA1999/065	Rural Australia Networks for You Pilot	SA Information Economy Policy Office	This project enabled the development of local expertise within the community and small business in accessing the information economy. The project built on existing telecommunications infrastructure in SA and created an integrated model of community education and access which formed the basis of a second stage (Networks for You - SA2000/176).	\$342,500
SA1999/066	Hawker Internet Access Project	Hawker Community Development Board	The establishment of a Point of Presence in the Hawker community facilitated low cost Internet access for local businesses and the broader community. The project was abandoned in August 2002 as services such as the virtual POP had been introduced by the Internet industry rendering the Hawker site obsolete.	\$59,406
SA1999/067	Survey of Outback Areas Communication Needs	Outback Areas Community Development Trust	The project surveyed residents covered by the Outback Areas Community Development Trust to determine their existing communication facilities and identify needs of communities and individuals for access to modern communications applications. The study identified the need for public Internet access points in a number of remote communities. These access points were funded under SA2000/162.	\$13,032
SA1999/068	Internet Provision for Kangaroo Island	Kangaroo Island Internet Inc	Funding for this project provided an urgently needed upgrade to an existing voluntarily run Internet Service for Kangaroo Island. The funding ensured the long-term operation and sustainability of the service and allowed for continued growth in Internet usage by local businesses and residents.	\$56,000
SA1999/069	Northern Region Mobile Phone Coverage	Northern Regional Development Board	A feasibility study was conducted into the establishment of mobile phone towers in the local government areas of Mount Remarkable, Orroroo/Carrieton and Flinders Ranges. The study recommended the establishment of a number of CDMA base stations which were subsequently funded under SA2000/149.	\$10,000
SA1999/070	Networking the Nulla Wimila Kutju Region	Umeewarra Aboriginal Media Association	A study was conducted into the telecommunications needs of communities in the Nulla Wimila Kutju (Port Augusta) Region in South Australia. The study determined the telecommunications infrastructure, awareness and training needs, and incorporated the feasibility of establishing web sites focused on local information and marketing local products and tourism packages. The study recommended the establishment of websites in the region, funded through local resources.	\$50,000

SA1999/071	Kangaroo Island Telecommunications - Mobile Telephony	Kangaroo Island Development Board	Digital mobile phone services covering Rocky River, and Vivonne Bay have been installed on Kangaroo Island. The installation of the mobile phone towers are providing benefits for Island tour operators, fishermen, visitors, local residents and National Parks and Wildlife Service personnel. Rocky River and Vivonne Bay sites were commissioned on 1 June 2001 and the official launch of CDMA coverage was held on 8 June 2001.	\$848,717
SA1999/072	Ara Irititja Archival Online Access Project - Stage 2 Implementation	Pitjantjatjara Council Inc	<p>The project developed an archive which identified, copied and electronically recorded the history of the Anangu (Pitjantjatjara/ Yankunytjatjara people). The archive, known as the Ara Irititja Archival Project, was developed with the Anangu specific cultural needs and, where possible, in Pitjantjatjara language.</p> <p>Prior to the implementation of the project, Anangu communities had limited access to and/or experience of online services. Through the development of culturally-appropriate online services, Pitjantjatjara and Yankunytjatjara communities are able to experience and embrace an IT future in which the past is protected, valued and fully integrated. The Project has been internationally recognised at two UNESCO meetings and its culturally sensitive software design is considered to be at the forefront of its field.</p> <p>The project can be downloaded from www.irititja.com.</p>	\$280,000
SA1999/079	South East and Murraylands Technology Enhanced Education and Music Program	Department of Education, Training and Employment, Instrumental Music Service, South Group of Districts	Provision of videoconferencing facilities in schools in the South East and Murraylands region of South Australia improved online education facilities for regional communities. The facilities improved training and education opportunities for students and teachers including remote access to music tuition, as well as provide the broader community with access to videoconferencing equipment for a range of uses outside the education sector. The final stage of this project saw the expansion of the network of participating schools with the purchase of three more video-conferencing units to be placed at Murray Bridge High School, Mannum High School and in Port Augusta.	\$107,864
SA1999/081	Regional Disabilities Project	SA Government Information Economy Policy Office	A needs analysis and business case was developed covering the provision of telecommunication services and equipment for people with disabilities in regional South Australia. The project included the identification of needs, technical options, training and support requirements and a cost benefit analysis covering options identified for improving online access for people with disabilities living outside the metropolitan areas. The SA Government has now used the study as a basis for planning services to people with disabilities in regional and remote SA.	\$30,000

SA1999/082	Mobile Coverage - Putting Eyre Peninsula on the Map	Eyre Regional Development Board	<p>The Feasibility Study (see SA1997/006), identified the need to provide extended mobile phone coverage to 7 cells across the Eyre Peninsula. The successful carriage service provider (Telstra) was able to provide significantly larger coverage than anticipated basic requirement of 7 cells, with the establishment of 17 CDMA base stations in 13 cells.</p> <p>The project covers about 90% of the Eyre Peninsula population, with around 10,000 additional people now receiving either portable or vehicle mounted coverage where they had none before. The long highway coverage gap has now been reduced east and south of Ceduna, and west and south from Whyalla, from 390km to about 20km.</p>	\$1,171,619
SA1998/141	Eyre Peninsula Regional Communications Initiative Infrastructure Implementation	Eyre Regional Development Board	<p>Through the installation of Points of Presence (POPs) across the Eyre Peninsula, the quality of Internet access and reduced internet access costs were realised for many communities across the region. PROJECT WAS TERMINATED</p>	\$213,250
SA2000/142	Kimba On-site Service Centre	Kimba Learning and Business Centre Inc	<p>The project provided an IT technical support service based in the town of Kimba for 12 months. Kimba and the surrounding Eastern Eyre Peninsula Region communities benefited greatly from the technical, consultancy, and educational services, offered as part of the project. It was a catalyst for the development of other strategies and initiatives on the Eyre Peninsula.</p> <p>The success of the IT service saw the project expand to cover the wider Eyre Peninsula. During the implementation of the IT service a no of formal & informal partnerships where developed, with the most notable between a local regional IT company and the local ISP.</p>	\$75,350
SA2000/143	Video Access Support of the NRDB's Small Business Centres Network	Northern Regional Development Board	<p>The Project built on the success of the NTN funded Regional Videoconferencing project by extending the VC network to include Quorn, Coober Pedy, Orroroo, Roxby Downs, Port Augusta, Peterborough, Hawker and Leigh Creek.</p> <p>The network has enabled the people of Northern South Australia to realise the value of using VC's. The project has significantly reduced costs, both in terms of time and travel for many community members and businesses, many of which now can participate in a range of forums and seminars. The VC network was seeking to The project was officially launched in May 2001 by the Deputy Premier of SA, with the SA State Government</p>	\$42,475

			encouraging its agencies to utilise the VC network.	
SA2000/148	Connecting Indigenous Community Links - Stage 2	Nangkada Tjikarna Council Inc	<p>This project built on the success of the first stage under NTN (SA1998/47). It enhanced the development and improved the self-reliance of Indigenous communities in rural and remote South Australia, by providing access to the Internet and skills in using the resources of e-mail and the World Wide Web.</p> <p>Public Internet Access facilities were established at seven Indigenous communities (Ceduna, Port Lincoln, Berri, Nepabunna, Port Pirie, Coober Pedy, and Murray Bridge). The training provided to these communities was enthusiastically taken up with around 38% more participants than originally expected.</p>	\$140,000
SA2000/149	Digital Mobile Phone Coverage in the Northern Regions of South Australia	Northern Regional Development Board	The project extended mobile phone coverage through seven CDMA mobile base stations to the districts of Melrose, Quorn, Orroroo, Wilmington, Carrieton, Leigh Creek and Wilpena Pound.	\$672,073
SA2000/150	Expansion of Telehealth Services in the Wakefield Region	Wakefield Regional Health Service	The project built upon the SA Virtual Health Network Project that had been funded under NTN. It established a telehealth videoconferencing network by upgrading facilities at Wallaroo, Angaston, Clare and Yorketown, and established videoconferencing services at regional hospitals in Tanunda, Kapunda, Eudunda, Burra, Balaklava, Riverton and Minlaton. The videoconferencing facilities have realised large cost and time savings for the community as well as allowing added value for money when training large groups.	\$387,000
SA2000/151	Strathalbyn Community Online Centre	Eastern Fleurieu School	The project established an Online Computing Centre in Strathalbyn in the Eastern Fleurieu Peninsula Region of SA. The Centre provides online computing access for a broad community including retirees, tourists, small businesses, local community groups and the unemployed. The Centre is located adjacent to the community library and has after-hours accessibility.	\$50,000

SA2000/153	Spencer Alternative Network Project	Whyalla Economic Development Board Inc	This Project developed a business case and associated technical and research information for the establishment of an alternative telecommunications infrastructure network for the Upper Spencer Region including the cities of Whyalla, Port Augusta and Port Pirie. The report recommended the development of an alternative telecommunications network.	\$50,000
SA2000/154	Kangaroo Island Community Electronic Commerce Project	Kangaroo Island Development Board	The project established a community access centre at Penneshaw which will provide the community with access to web enabled PCs and Internet training. The Centre is co-located with a Rural Transaction Centre that provides postal, banking facilities, medicare easy claim booth, meeting rooms for visiting professionals and community groups, business binding, laminating, photocopying, faxing and office supply facilities..	\$84,000
SA2000/155	Outreach Videoconferencing System	Tailem Bend District Hospital	The Project set up an Outreach Video Conferencing System with two studios, one in the Tailem Bend District Hospital and the other in the Coomandook Area School Library Annexe which provides 24 hour access for a range of community activities including crisis care and emergencies.	\$21,715
SA2000/156	South Australian Regional Community Information System	Local Government Association of South Australia	A Local Government geographic information system was developed to provide communities with online access to information such as mapping, zoning, economic development, environmental conditions and general planning information was established. It acts as a valuable planning tool for regional, rural and remote communities. A pilot involving four sites was established to trial the information system in South Australia.	\$177,000
SA2000/157	Murray Mallee Telecommunications Study	Murraylands Regional Development Board	A telecommunications plan for the Murray Mallee region in South Australia was undertaken. The plan led to an application for BARN funding.	\$10,000
SA2000/162	Establishment of Internet cafes/kiosks in remote SA	Outback Areas Community Development Trust	The project involved the installation of Internet booths which allow community and tourist access to the Internet at the remote centres of Border Village, Penong, Coorabie, Andamooka and Parachilna in South Australia. These facilities have also been used for training and awareness raising programs.	\$38,300
SA2000/170	Distance Mental Health Care - Clinical Services, Education and Training	Royal Adelaide Hospital, Glenside Campus Mental Health	The project built on the existing SA Telehealth Network by installing Video Conferencing units into the Eyre, Wakefield and Mid North Regions of South Australia. Funding covered the development of a scheduling and reporting system to assist in the management of the network. The facilities have improved access to mental health services and are available for community use outside the health sector.	\$284,957

SA2000/176	Networks for You - Stage 2	SA Information Economy Policy Office	The statewide internet awareness raising initiative was extended to ensure the demand for training was effectively addressed in regional, rural and remote communities in South Australia. E-commerce training was also available through the Stage 2 project, and the needs of indigenous communities and people living with disabilities were also addressed.	\$3,995,900
SA2000/183	Community Access Centre	District Council of Loxton Waikerie	The Loxton Community Access Technology Computer Hub (CATCH) was established in 2001. The Centre has successfully become a regional focal point for IT learning and education and provide all sectors of the community including small businesses, tourists, local community groups, and the unemployed, with opportunities to access IT training and online services.	\$197,916
SA2000/187	Maitland Community Access Centre	Maitland Progress Association	This project established an Online Access Centre with 9 computers in the town of Maitland on the Yorke Peninsula which gave the community and tourists access to internet facilities. The Centre has also provided IT training to the community. It is estimated that 200 people over the age of 12 use the centre on a regular basis.	\$138,444
SA2000/188	Information Economy Strategy for Regional Local Government	Local Government Association of South Australia	An IT strategy for South Australian regional Local Government Authorities was undertaken. The strategy provided a comprehensive vision for getting regional Local Government in SA to provide their services online to the communities. The completed study formed the basis of the project plan for Local Government Electronic Services Project (SA2001/238) which was subsequently funded under the Local Government Fund in 2001.	\$135,000
SA2000/199	The Hub - Coonalpyn Communication Network	Coonalpyn Communication Network	This project established a community access centre for Coonalpyn and the surrounding district. The centre offers local residents and visitors access to web enabled PCs and Internet training.	\$177,000
SA2001/214	Redressing telecommunications deficiencies in the Murray Mallee of SA	Murray and Mallee Local Government Association	A CDMA mobile base station was established at Alawoona in the Murray Mallee region. The tower provides extended coverage in the town and surrounding area including the Murray Bridge to Loxton Road.	\$90,000
SA2001/215	Southern Goyder Telecommunications Network - Stage 2	Southern Goyder Telecommunications Network Incorporated	This project established community access centres in Eudunda and Robertstown and provide people in these communities and adjoining areas with access to the Internet and other online services including training. The second phase of the project provided funding to employ a Centre Manager for the centres and to purchase some additional equipment for the centres. In 2002 over 250 people have undertook training at Eudunda.	\$48,400

SA2001/220	Computers for the Community	Renmark Paringa Community Centre	The program funded the establishment of a public Internet access facility in Maitland which provides online services and training to residents of Two Wells and surrounding areas. This centre has also aided job seekers in improving their computing skills and enhancing their job prospects.	\$116,849
SA2001/222	Mobile Phone Coverage Andamooka	Northern Regional Development Board	NTN provided funding to improve mobile phone services to Andamooka and the surrounding area through the establishment of a CDMA mobile base station.	\$125,638
SA2001/224	Wattle Range Communities Online	Wattle Range Council	Four Community Internet Access Centres were established in the lower southeast region of SA in the towns of Mount Burr, Nangwarry, Kalangadoo and Tantanoola. These centres provide people in these communities and adjoining areas with access to web enabled PCs and Internet training.	\$140,000
SA2001/225	Videoconferencing facilities for Eyre Peninsula	Eyre Regional Development Board	Seven videoconferencing units were installed at Elliston, Cowell, Cummins, Kimba, Cleve, Port Lincoln and Whyalla. The project enables businesses in remote locations to have face to face contact with the Eyre Regional Development Board and Whyalla Economic Development Board, as well as provide the community with access to videoconferencing facilities for a range of broader community use.	\$60,000
SA2001/227	Port Pirie Community Internet & Technology Centre	Port Pirie Regional Council	The project established a community access centre in the Port Pirie. The centre provides people in Port Pirie and surrounding areas with access to web enabled PCs and Internet training.	\$217,150
SA2001/230	Booleroo Centre Mobile Coverage	Northern Regional Development Board	A CDMA repeater was installed in Booleroo Centre to provide mobile phone coverage in the area.	\$72,394
SA2001/231	Morgan Internet & Resource Centre	Mid-Murray Council	Funding was provided to establish a Community Access Centre in Morgan, which provides the community with access to online services, training, information and photocopying services.	\$168,360
SA2001/235	Telecentres for Eyre	Eyre Regional Development Board	Four Community Access Centres in the towns of Coffin Bay, Elliston, Cowell and Streaky Bay were established. These provide these Eyre Peninsula communities with access to online services, training and information.	\$371,595
SA2001/238	Local Government Electronics Services Program	Local Government Association of South Australia	Implementation of the Local Government Information Economy Strategy to deliver an online 'one stop shop' for Regional Local Government Services.	\$4,996,000
SA2001/242	Telecommunications Initiative Investigation	Central Local Government Region of SA	A feasibility study to establish an alternative telecommunications network in Central Region of SA was proposed. However this study did not go ahead, due to an alternate program being	\$1,739

			funded under the NTN 'BARN' program. The recipient returned the balance of \$43,261	
SA2001/249	Two Wells Community Access Centre	Two Wells and Environs Strategic Planning Committee	A public Internet access facility was established in Two Wells to provide online services and training to residents of Two Wells and surrounding areas.	\$63,000
